Office Action Summary

Art Unit: 3641

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 1-11, 13-15, 17-22 and 24-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Minnick. See col. 2, middle and the examples.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12, 16 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Minnick in view of Shannon.

Minnick teaches the detonating which is diluted by the combination of materials, including microballons, bagasse, and ammonium nitrate. He teaches the general use of explosives, but prefers nitromethane. Shannon teaches the use of PETN as the main explosive in a detonating cord. It would be obvious to sensitize the PETN of Shannon in the manner of Minnick if the sensitizing of such a detonating cord were desired.
